Along with HyperMotion Technology, FIFA 22 introduces Next Player Control, allowing players to control other players with their foot; free kicks and corners allowed to be taken with either foot; and an all-new series of One Touch Control features. The 2017 FIFA World Cup™ is the globe's largest and most popular annual sporting event. After the final stage concluded, FIFA developed a vast amount of data and is confident that this will greatly enhance the FIFA World Cup experience, with more "FIFA Moments", players feeling more connected to the game, and enhanced authentic gameplay. In the FIFA Ultimate Team, where you can assemble your very own team of football stars, The Journey Mode has been updated to include a "My Team Story" feature. This unique story will take you through the career of all players in your custom team, and also includes the introduction of new Team Goals through the Game Center on the FIFA Mobile app. In The Journey Mode, players will begin with a lower tier squad and will be able to earn FUT Packs that will allow you to level-up and buy new players to upgrade your custom team. You can make your own journey throughout the career of your chosen team, building up your all-time collection of FUT players and adding milestones to your journey with the help of Game Center. FIFA 18 also introduced a host of innovative user-experience features in career mode, including a whole new way to level-up and develop your players, and new My Player function. Now you can share your journey with friends on Twitter and Facebook. As usual the game includes new features that will enhance gameplay on mobile devices, including: Player Vision, which allows players to track their opposition quickly and effectively, and see which opponents are open and closed; the return of last-ditch tackles, as a means to score from set-pieces and counter-attacks; and, up to 10 players can now be integrated into any offensive or defensive play. Features: Introduces 'HyperMotion', a highly advanced Motion-Capture engine that takes in motion-captured data and players' physical movements and adapts their actions and reactions as if they were real. New 'Next Player Control' allows players to control their opponents with their feet or throw in a new free kick or corner. For the first time ever in FIFA, free kicks and corners can be scored with either foot.

Fifa 22 Features Key:

- **Transfer Update** – Get ready for your new club! And, new to FIFA 22 is the introduction of outright Transfer Updates, also known as TUs. This update allows licensed club owners to improve their transfer market, ready for the launch of FIFA 22. In addition to improving teams and technical innovations, there are also major effects on the transfer market itself, including a refreshed UCL and new player movement windows, and new first-team bonuses — all of which can profoundly affect how players develop.
- **Improved Pass Movement** – Play the game the way you want to play! Passes are better this year - with improved player selection of the first pass type, and accurate pass predictors for first-time shots and passes. New data from real-time passes has improved pass selection on natural and backwards pass. made run-up for perfect passes more realistic, increased the number of passes that provide boosts, and set up passes for close control of the ball to reduce pressure on the player to handle it quickly.
- **New Hostile Zones** – Now in FIFA 22, as previous in FIFA Ultimate Team, it's harder to get hit from behind when in a hostile zone, giving you a better chance of bouncing off the back of the attacker and intercepting the ball.
- **Advantages from Goalkeeping** – In FIFA Ultimate Team, players develop better when you're in goal. In FIFA 22, new 'Champion' goalkeeper development tricks will help your goalkeeper improve his shot-stopping and diving against shots into the goal. Goal-keepers also have a new 'Easy C1' perk which helps your goalkeeper predict shots out of the area better.
- **Player Movement: Super Eagles.**
- **Improved AI Football** – The new AI in FIFA Ultimate Team and FIFA 22 is better at predicting what you'll do and placing their players to predict passes, moves, and interceptions. The AI makes decisions quickly, more intelligently, and improves based on your style of play.
- **Player Behaviour: Super Eagles.**
- **New Weighting System** – The weighting system in FIFA has been enhanced in FIFA Ultimate Team to give your players more control, and help them better move and fit into the game. Priority passes and heading behaviour will now differ more effectively for players, adding a higher concentration of accuracy to prioritise cutting in for long passes.
