I need this mainly for my iPad but I can change the size. I'm using the drawing app, SketchBook Express. If anyone could give me some pointers, would be super awesome. A: To embed things you can use the tag, that can be found here. For your SVG file you can use embed in the following way: To get the dimensions of an SVG file you can use the getBBox method: `var bbox = mySvgElement.getBBox();` Then you can use the following to resize it: `var newWidth = innerHeight*10; var newHeight = innerWidth*20; element.setAttribute('width', newWidth); element.setAttribute('height', newHeight);` This is a short tutorial about SVG2PDF.

package de.vogella.databinding.view; import org.eclipse.jface.databinding.ViewDataBinding; public class View { public String text; public View(String s) { text = s; } public void setText(String s) { text = s; } public String getText() { return text; } public ViewDataBinding createBinding() { return new ViewDataBinding(this); } } Q: Store multiple data in an array in php I am working on a project and would like to store some data in an array using php. The data has the following structure Array { [0] => 25,36 [1] => 3.54 } These are phone numbers. I would like to store them in the following array Array { [0] => 25,36 [1] => 3.54 [2] => 2.3 [3] => 25.64
