Checked for a better deal with the seller who seemed to offer a better discount. I wasn't taken in by the text messages and I ended up adding funds to my 3rd account instead of going back to my credit card. You'd think that would have been a tip off. I went with 3rd party sellers from now on and I'm never going back to eBay. Sky blue ZOOM U2 Power Zoom V8,White. This application is designed to allow you to set up the Linksys EA4500 router. It can also be used to verify the settings of the router once you have the desired settings. The settings will not only be optimized to work, but they will also be safe and secure. This will also work for the 2.4 Ghz band, which is not normally used. Some of the most common features include: DNS Server- Pointing nameserver IP to router. UPnP Client- Allow your computer to open up to the internet. EAP Supplicant - Allows you to connect with EAP-SIM cards. Wireless Channel- Allows you to find the best channel to use. SSID- Allows you to choose a network name for your wireless router. MAC Filter- Allows you to filter MAC addresses on your router. NAT Port- Allows you to turn on port forwarding. Default Gateway- Allows you to set your default gateway. Domain Name Server- Allows you to point your nameserver to your router. The manual is not very short or complex, which is why it is easy to follow and understand even for those who have never used this application before. The various tabs in the application are relatively organized and as you move through the sections, the information you are going to be presented with is very detailed. Once you reach the end of the instructions, you will have to simply enter some of the passwords and you can then proceed to the next step. Once you are done with all the steps, it is time for you to simply select the test button and wait for the device to do the operation. If you are completely satisfied with the outcome, then the router will be ready for use and you can now set up the wireless network.
