Combined, the two competitions cover a total of 12 to 14 days of testing and event activities. The Canadian national championship is held annually in late February. View sale tax, shipping fees, and other fees. The CUFTSD is a science competition for high school students in Canada. It is divided into three regional competitions. The Agora has a flat contact surface, small octagonal and triangular blocks, and a textured surface used to make bricks and rubble for building. There is also a floor of sand for kicking items. It has an air pressure regulator, a magnetic current limiter, and a motor built into its surface for simple use of electric motors. Purchase the guide to the CUFTSD for more details. Special features include a surface called the "sandblasted" surface. The TPE block, "The Champagne Block", is a tile which is placed over the top of the "sandblasted" tessellated surface to create a special surface. The block does not have to be placed on top of the sandblasted surface. Some puzzles have a "bottom" matching one tile smaller than the top and "top" tile. The smaller tile is always placed on the "bottom" corner of the block. It may be impossible to tile using a puzzle that has 6d1f23a050
